

IDG Tool Repair & Application Services

IDG carries only premium tool brands and can test, calibrate, certify and even build custom application solutions. IDG's trained technicians can perform the diagnostics, analyze the results and perform the necessary maintenance checks to keep your tools running smoothly and your productivity high.

Quality

IDG provides the brands you want, with the service you need. We take care of the tools that take care of you.

Reliability

IDG reliability is unmatched in the industry. For you, tool service quality and quick turn around are a must, but without reliability, it means nothing.

Quick Turn Around

IDG not only understands the importance of every tool repair, we know you need it now.

Your Tool Service Solution

IDG's six facilities are conveniently located across the United States to meet your needs. With over 150 years of combined experience, we are dedicated to providing the highest quality repair service in the industry.
